Office Action Summary	Application No. 10/780,068	Applicant(s) FISHER, SIDNEY	
	Examiner John B. Walsh	Art Unit 3676	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the inside and outside door handles must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,931,034 to Fisher.

Fisher '034 discloses an input member (28); an output member (16); a first condition (figures 2, 3 and 5 show members coupled) wherein the input and output members are coupled; a second condition (figure 4 shows members uncoupled due to lost motion) wherein the input member is not coupled to the output member; a blocking member (10).

As concerns claims 2 and 5, the blocking member prevents the output member from moving to its respective position (10 locks/blocks 16).

As concerns claims 3 and 4, the blocking member does not prevent the input member from moving to its respective position (figure 4; 28 freewheels due to lost motion).

As concerns claim 6, the input member is rotatable about an input pivot (18).

As concerns claim 7, an output pivot (18).

As concerns claim 8, the input and output pivots are coaxial (18).

As concerns claim 9, the input and output members are adjacent (figure 2).

Art Unit: 3676

As concerns claim 10, the blocking member is stationary (stationary when no force acted on the member).

As concerns claim 11, the blocking member is movable (movable when force is acted upon the member).

As concerns claim 12, the blocking member is abutable by one of the input or output members (figure 2).

As concerns claims 13 and 21, a clutch (32).

As concerns claim 14, the clutch rotates to actuate (movement of 36 rotates 32).

As concerns claim 15, the clutch is pivotally mounted to at least one of the input and output members (figure 2).

As concerns claim 16, the clutch translates to actuate (figures 2-5).

As concerns claim 17, the clutch is operably connected to the blocking member (connected through 42).

As concerns claims 18, 20 and 22, the input member is connectable to an inside and outside door handle (column 2, line 2).

As concerns claim 19, the clutch acts as part of a child safety mechanism (column 2, line 60; feature provides a safety mechanism for children as well).

As concerns claim 23, the clutch acts as part of a superlock mechanism (column 2, line 60).

Art Unit: 3676

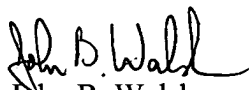

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
